

What can I do with this major?

Radiation Therapy

Radiation therapy is a highly specialized field in oncologic medicine. It is the use of high energy x-rays, radioactive materials and other sources of ionizing radiation in the treatment of disease, most commonly cancer. Sophisticated state-of-the-art equipment is utilized by skilled, professional therapists in conjunction with the radiation oncologist and radiation physicist to treat cancer.

Skills/Competencies Associated with Radiation Therapists Majors:

- Ability to work well with people and data
- Strong leadership skills
- Trustworthy, integrity and businesslike
- Ability to evaluate and follow procedures
- Ability to inspire productivity and loyalty
- Adaptable and flexible
- Likes challenges, questioning and analyzing
- Problem solving and intellectual growth
- Proficiency in reading, for accurate details
- Operate scientific equipment
- Desire for preciseness
- Desire to help humankind
- Organize and maintain accurate records
- Make critical observations and decisions

Related Occupations:

Application Specialist	Medical Imaging Tech
Biomedical Engineer	Medical Physicist
Diagnostic Medical Sonographer	Nuclear Medicine Technologist
Doctor	Nuclear Power Plant Radiation Safety Officer
Health Administrator	Radiologist
Health Professions Educator	Social Worker
Medical Dosimetrist	Surgeon
Medical Equipment Sales	

* This is only a partial list and not meant to limit you. Come to Career Services to explore your options further.

Strategies:

- Be sensitive to a patient's physical and psychological needs
- Develop sound knowledge of human anatomy and radiologic techniques and equipment
- Improve ability to work in a team atmosphere and collaborate with colleagues
- Enhance proficiency with computers
- Develop communication skills
